INSTRUCTION FOR USE

AQUA MARIS STRONG FOR THROAT
Spray for local use

Registration number: JIC-002319
Trade name: AQUA MARIS STRONG FOR THROAT
Medical form: Spray for local use

Composition
100% sterile hypertonic solution of Adriatic Sea water with natural salts and microelements. Preservatives free.

Content of ions:
- Sodium (Na\(^+\)) - minimum 7.50 mg/mL;
- Calcium (Ca\(^{2+}\)) - minimum 0.25 mg/mL;
- Potassium (K\(^+\)) - minimum 0.20 mg/mL;
- Magnesium (Mg\(^{2+}\)) - minimum 1.00 mg/mL;
- Chlorides (Cl\(^-\)) - minimum 16.50 mg/mL;
- Sulfates (SO\(_4^{2-}\)) – minimum 1.80 mg/mL;
- Hydrocarbonate (HCO\(_3^{-}\)) – minimum 0.10 mg/mL;
- Bromides (Br\(^-\)) - minimum 0.04 mg/mL.

Description: colorless solution with light specific sea odor.

Pharmacotherapeutic group: drug product for treating throat infections
ATC-code: R02A

Pharmacological properties:
The drug product based on hypertonic sterile solution of sea water is used for treating, preventing and for hygienic convenience for cleaning, removing irritation and protection of throat mucous membrane. Microelements contained in the product improve resistance of throat mucous membrane to pathogenic germs and viruses, facilitates local immunity.

Indications for use:
- for prevention and in complex treatment of acute and chronic, infectious and inflammatory throat diseases (tonsillitis, adenoiditis, pharyngitis, laryngitis)
- for prevention and in complex treatment of acute respiratory infection (including pregnant and lactating women);
- in patients with extreme dryness of posterior pharyngeal wall membrane as a result of increased air dryness or contamination (central heating, conditioning) to preserve physiological properties of throat mucous membrane under changed microclimatic conditions.

Contraindications
Hypersensitivity to drug components.

Posology and administration
Spray for local use.
To adults and children 4-6 times a day 3-4 injections inclining spaying device onto posterior pharyngeal wall.
Before use turn spraying device into horizontal position. When using for the first time press on cap for several times.

**Adverse reactions:** allergic reactions are possible.

**Overdose**
No overdose events are registered.

**Drug-to-drug interactions**
The drug product does not render systemic exposure on organism, so there are no drug-to-drug interactions registered. It is possible to use the drug along with the other drugs used for treating inflammatory throat diseases.

**Precautions for use**
Use with caution in children under 1 year old.

**Effects on ability to drive and use machines**
No data available.

**Form of presentation:**
Each dark-glass bottle with spraying device contains 30 mL of drug. Each carton box contains one bottle with instruction for use.

**Shelf-life**
3 years.
Do not use after expiry of shelf-life specified on the box.

**Storage conditions**
Store under temperature less than 25 °C out of reach of children.

**Dispensing rules**
No prescription required.

**Manufacturer**
